Berlin, Germany | (+49) 173 910 14272 | m.abdelsattarahmed@gmail.com | linkedin.com/in/mabdelsattar1

PROFESSIONAL SUMMARY

Results-driven **Senior Android Engineer with 9+ years** of experience designing and scaling mobile applications for millions of users. Skilled in Kotlin, Jetpack Compose, and Clean Architecture with a strong background in performance optimization, CI/CD automation, and cross-functional collaboration. Proven record of improving app stability, code quality, and delivery speed across fast-growing startups and enterprise environments.

EXPERIENCE

Just Eat Takeaway

Senior Android Engineer | Dec 2022 – Present

- Optimized CI/CD pipelines, cutting deployment time by **15%** and improving release reliability.
- Designed and shipped the **courier–customer chat** feature, improving delivery coordination by **40%**.
- Led the migration from XML to **Jetpack Compose**, implementing **75%** of feature parity and improving UI performance.

JUCR GmbH

Senior Android Engineer | Jul 2021 – Oct 2022

- Developed and maintained the **JUCR EV charging app**, serving users across **300K+ European stations**.
- Reduced app crashes by **4%** and improved startup times by **12%** via architectural refactoring.
- Integrated **GraphQL** with **Kotlin Coroutines** to enhance data performance and responsiveness.

Heaxd GmbH / Volkswagen

Software Engineer | Oct 2019 – Jul 2021

- Built and maintained internal **Android SDKs** powering Volkswagen Group applications.
- Improved unit test coverage and adopted code quality automation, reducing regressions in production.
- Refactored legacy codebases to cut build times and memory usage, accelerating developer productivity.

Winfooz

Android Engineer | May 2019 – Oct 2019

- Led the end-to-end development of secure in-app signature features for the trading platform.
- Enhanced runtime performance and maintainability via architecture and codebase refactor.

CrossWorkers / Data Know How

Android Developer | Jun 2018 – May 2019

- Managed feature delivery from requirement analysis to testing and deployment for B2B Android apps.
- Proactively reduced technical debt through systematic refactoring and modernization.

NAQLA

Android Developer | Oct 2016 – Jun 2018

- Developed and maintained logistics apps enabling real-time fleet tracking and delivery management.
- Owned full release cycles, publishing updates to the Play Store and training internal users.

SKILLS

- Languages:** Kotlin, Java, XML
- Frameworks & Tools:** Jetpack Compose, Room, Retrofit, GraphQL, REST, Flow, Coroutines
- Architecture:** MVVM, MVI, Clean Architecture, Modularization
- DevOps & Testing:** CI/CD, Gradle, Bitrise, Firebase, Espresso, JUnit
- Other:** Performance tuning, Code reviews, Feature delivery

PROJECTS

Takeaway.com Courier App (Ongoing)

- Courier-facing app enabling real-time delivery tracking, order management, and customer communication.
- Built with Kotlin, Jetpack Compose, MVI, Clean Architecture, Hilt, Coroutines, CameraX.

JUCR EV Charging App

- Android application providing access to 300K+ EV charging stations across Europe with search, reservation, and payment.
- Implemented using Kotlin, MVVM, GraphQL, Coroutines, Retrofit.

EDUCATION

Cairo University

B.S. in Computer Science (Minor: Information Systems)
